

*"Award Winning Space Solutions"*

*Smarter Modular Solutions*

A Subsidiary of Vanguard Modular Building Systems

## Hall-Dale Elementary School Farmingdale, Maine

"We were favorably impressed with the quality construction of our temporary school building. Schiavi Leasing made it easy to quickly house our students and responded in a timely manner to all issues. We were even able to incorporate some of our own ideas into the building plans. If the need arose, we would be sure to contact Schiavi in the future."

**Nora Murray**  
Superintendent  
Hall-Dale Elementary School  
Farmingdale, Maine

**Challenge:** The expanding population and desperate need for renovation of the 50-year old school created an immediate need for over 16,000 sq. ft. of elementary school space for 200 students. The Schiavi Leasing technical team needed to solve this crisis, on time and on budget.

**Modular Solution:** The solution was a complete turnkey project - including excavation, foundation, modular building design and construction, installation, landscaping and drainage, electrical, plumbing, fire alarm, data and communications wiring, a complete sprinkler system throughout the building, plus a heated connecting corridor to the adjacent school.
