

"Award Winning Space Solutions"

Smarter Modular Solutions

A Subsidiary of Vanguard Modular Building Systems

Sinai Hospital Administrative Offices Baltimore, Maryland

"Continued hospital growth necessitated quick relocation of our HR, Legal, Marketing and Support Services, but space on campus is a premium. Vanguard Modular provided a cost-effective modular solution, and worked within our constrained timelines. All departments were very pleased with their new offices, and any concerns about the quality of a modular building were quickly dispelled. The Vanguard Modular team has been great to work with...we have already begun working on two additional modular projects with Vanguard Modular."

John Bond
Project Coordinator
Sinai Hospital, Baltimore, Maryland

Challenge: Sinai Hospital needed an administrative building to house four separate departments. The exterior of the new space needed to match the architecture of recent expansions at Sinai Hospital while at the same time the new building had to be cost effective. An added challenge was that the four departments had to be moved during one weekend and be fully operational the following Monday morning.

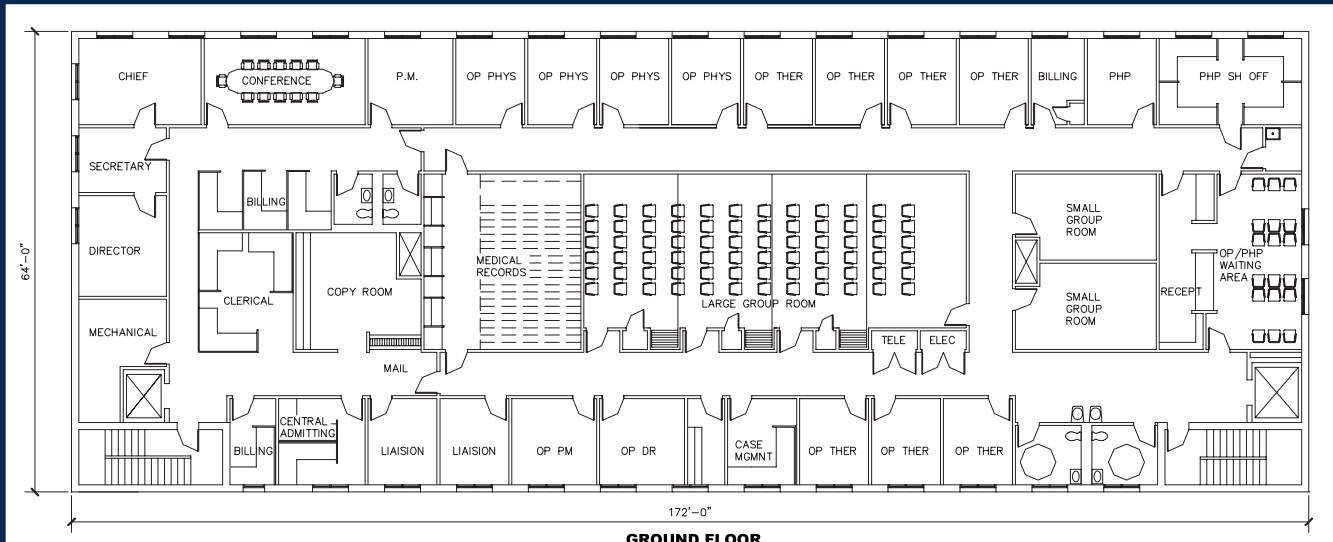

Modular Solution: Vanguard Modular's construction greatly minimized site disruption and was complete in just two weeks. The four departments were moved and fully operational on time. Cost-effective materials, such as Hardi Panel Siding and Hercu-Bond split face block panels, were used to match the architecture. For maximum relocation efficiency, a temporary foundation system was also constructed.
